

# ROCK ROCKS YOU

When rock is not only a label and music arises from the heart, well let's call the Red Hot Chili Peppers and they will answer. You haven't got a second chance: their music is the only one possibility! Wake up! Hurry up! Start living!

The Red Hot Chili Peppers will help you rise from the surface of this miserable world where people are happy with appearance.

It's more than a rebellion, it's a way of being, maybe the only one or the best way to escape from the mediocrity of everyday life.

Unprejudiced, sparkling like water, the Red Hot Chili Peppers don't accept compromises or limitations: they are just what they want to be! That's to say, free as I want to be!

What about their music? There're no words to identify it because it goes beyond the limits of categories. However, the hard and decided sound ranges freely in the rock and funk world: their music speaks by itself and tells stories of love, friendship, passion, suffering and loneliness. It's hard rock which has the courage to shout the anxieties of young people and their problems.

It's an angry cry which comes from a youthful heart: a heart which is neglected by the universe, a desert island in the ocean, a cloud in the sky which is waiting of being driven away by the wind.

*"Sometimes I feel like I don't have a partner, sometimes I feel like my only friend, is the city I live in, the city of angels, lonely as I am. Together we cry..."* from Under the bridge. It's just life which writes The Red Hot Chili Peppers' songs.

The Red Hot Chili Peppers were born in California in 1978: since then their songs have been an explosion of funk carnal sensuality in a mixture of rock, pop and rap sounds. It's my opinion that they're the best rock group in the world.
